

Time Usage Analytics Page User Manual: Personal Time Manager

Overview

The Time Usage Analytics Page provides a graphical representation of how time is allocated across different task categories (tags). The chart helps users visually analyze the distribution of their time usage based on the tasks they've recorded.

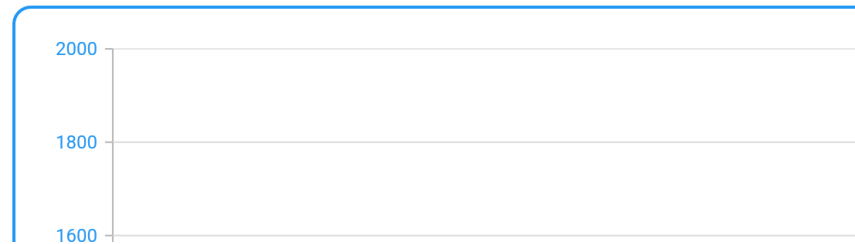

Features and Functionality

1. Navigation Bar

- **Back Button (Arrow):**
 - Located at the top-left corner of the screen, the back arrow button allows users to navigate back to the Home Page.

← Time Usage Analytics

Time Allocation by Tag

Analytics Chart

- **Bar Chart:**

The bar chart displays the time spent for each tag in the form of different colored vertical bars.

 - **X-Axis:** Represents the tags (ex: ASE 456, school, work, gaming, personal).
 - **Y-Axis:** Represents the total time spent on each tag in minutes.
 - **Bar Colors:**
 - Each bar is color-coded to make it visually distinct. This helps users identify different tags and their respective time allocations easily.
- **Interactive Features:**
 - The chart updates dynamically as tasks are added or deleted.
